## Attachment 2 - Regular Benefits DOEE's LIHEAP Regular Benefits Table for FY 2023 See below for explanation

## Explanation Key: How to use this table

Use this table to determine how much of a LIHEAP benefit a household may receive for this fiscal year.

Before you start working through the table, you must see if the household is eligible for a LIHEAP benefit. That Step 1:

will depend on the size of the household and the combined income of its members.

A household is people who live together. It may be one person, a family, or another group who share the home.

## Income Limits for FY 2023

1 person	\$42,920	5 people \$95,744
2 people	\$56,126	6 people \$108,950
3 people	\$69,332	Additional guidelines are calculated by taking 132% plus 3 percentage points for each household
4 people	\$82,530	member above six multiplied by the guideline for a household of four.

IF the household income is less than the income limit for the persons, go to step 2. IF NOT, the household is ineligible.

Next, is your house a "single family" home (SF) or "multifamily" (MF)? Multifamily usually means apartments. Step 2:

Go to the section that lists the "Home Type" group for you -- SF or MF.

Now, find the "Income Household's" line for the number of "People" in your home. Step 3:

This is the number on the table that is just lower than your combined household income.

Example: If you are in an apartment with 4 people, and your annual income is \$4100, you would go the line that says MF 4000 4.

Step 4: Find the home heating source for your home. That tells you the maximum benefit for you.

Example of a household living in a multifamily building, with an income of \$4,000, four people in the household, and a gas heated home:

The maximum benefit is \$1800, which may be applied to the electric bill.

The oil benefit is never more than \$1500. But, you can instruct DOEE to pay the utility company that supplies cooking electricity or gas.

Example of a household living in a multifamily building, with an income of \$4,000, four people in the household, and an oil heated home:

MF 4000 4: Instead of paying the oil company, you can have DOEE pay a maximum of \$1,471 electric or \$883 gas. If your utilities are included in your rent, so that Heat is In Rent (HIR), the benefit can never be more than \$250,

paid directly to your utility company for your electric or gas used for cooking or light, etc. DOEE pays the utility company directly.

Note: For households with greater than four people, use the benefit line for "4" people. (This table continues on the next page.)
